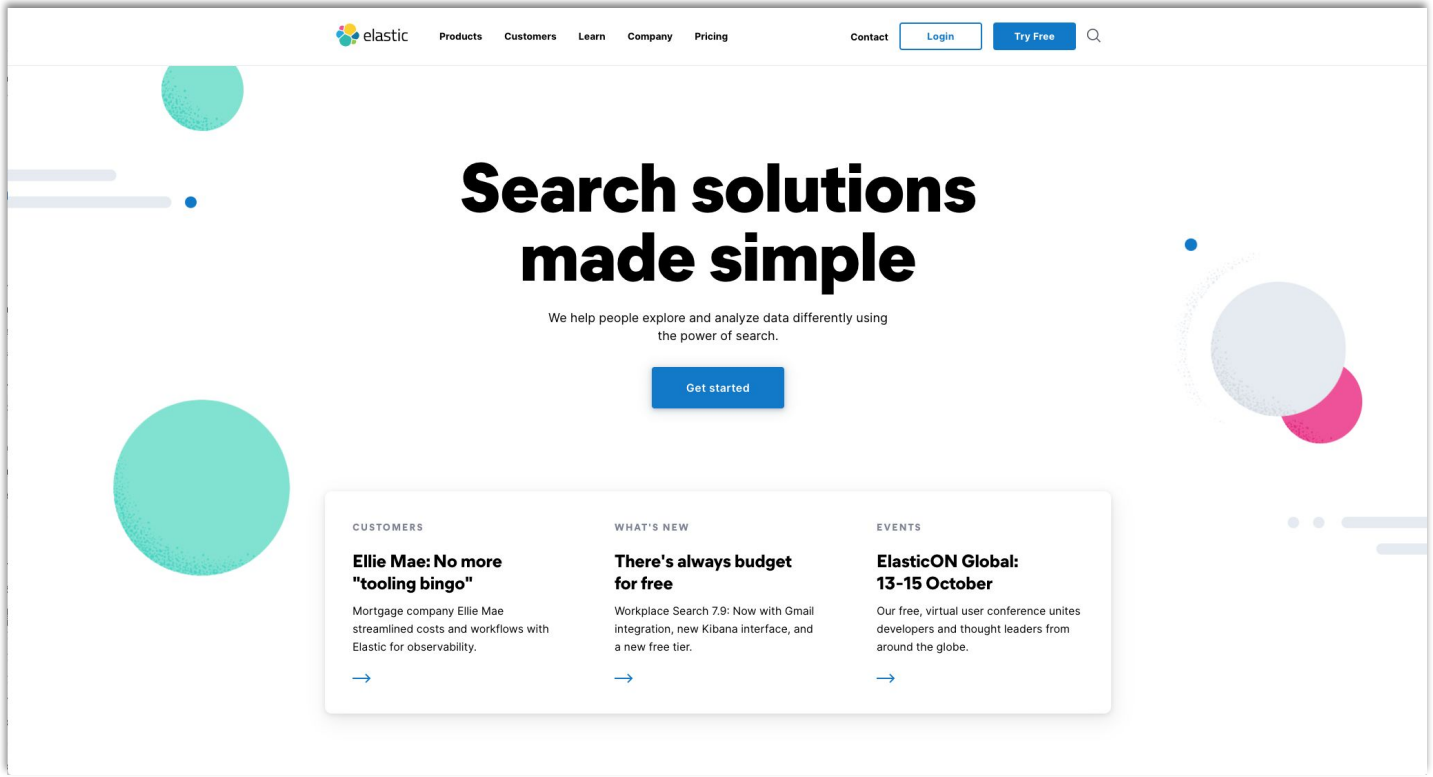
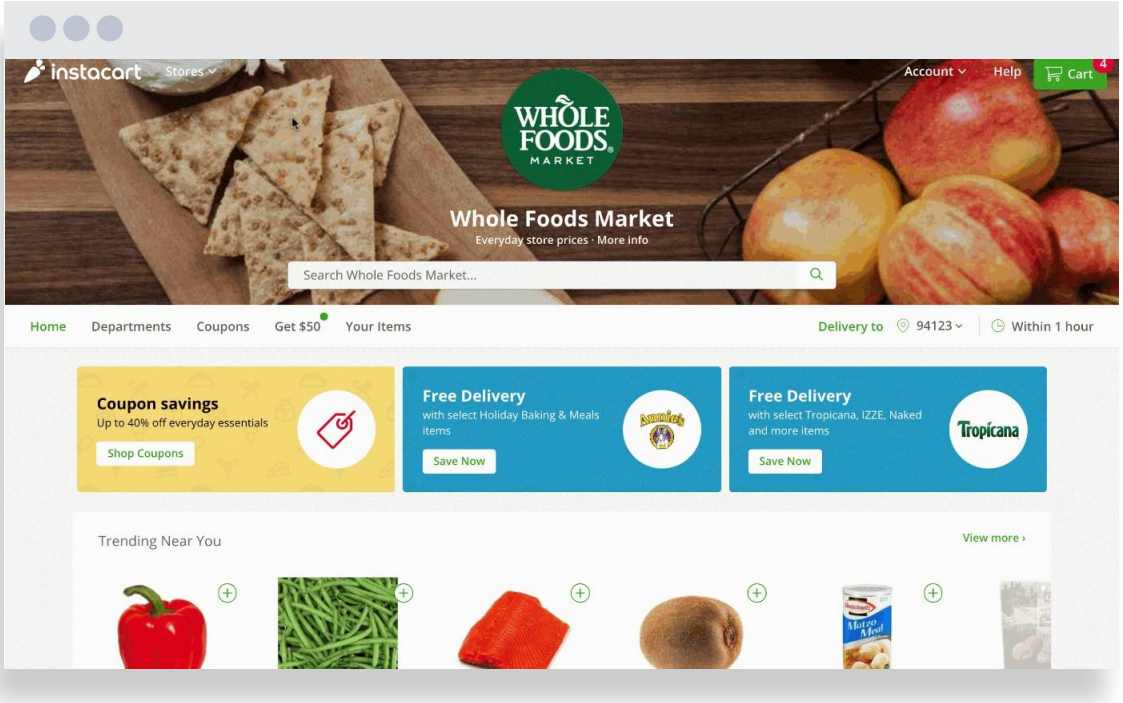
Elastic?

elastic

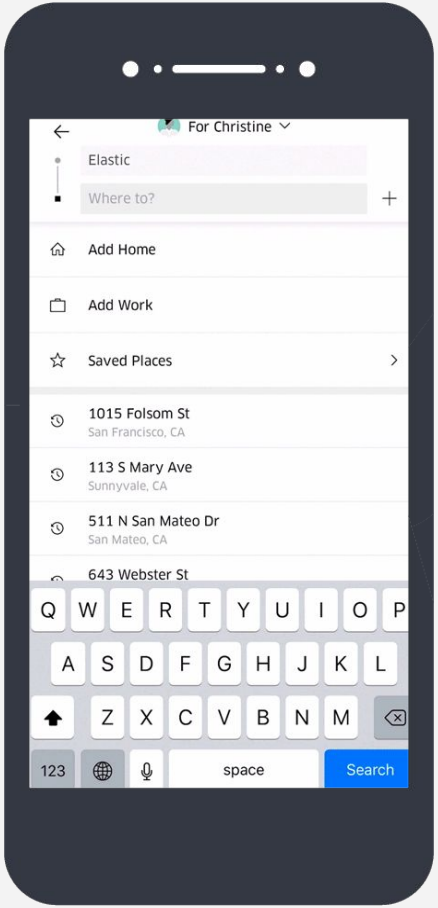
We’re a search company



instacart



elastic



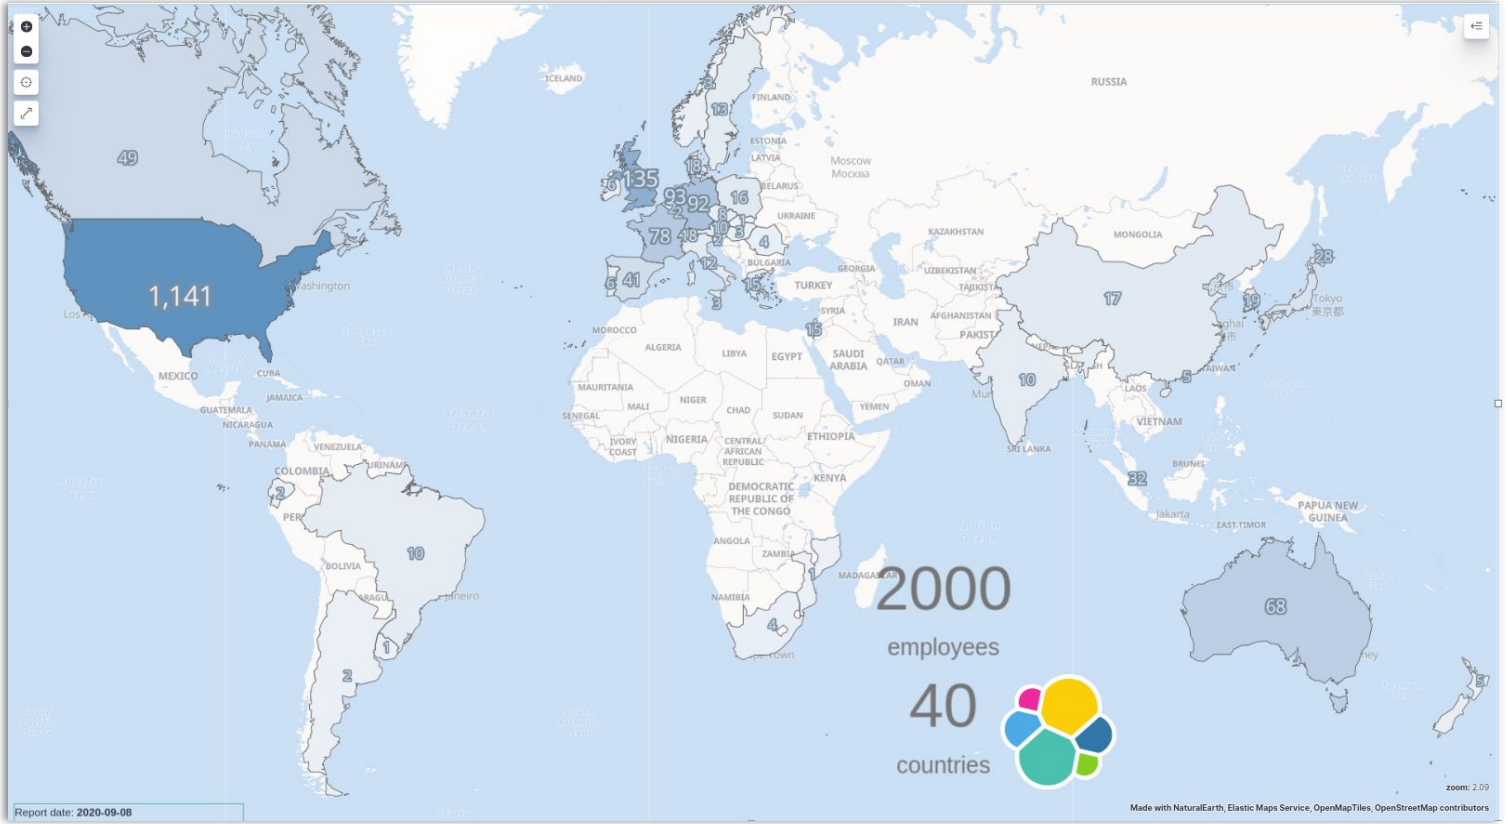
Searching for **Rides**

elastic

We mine and analyze 4 billion events every day to detect security hacks and threats.

elastic

A search company with a distributed global reach



A global company with a *source code*

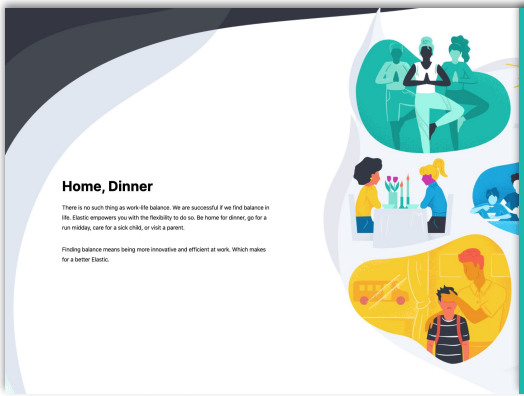
elastic

OUR SOURCE CODE

These are some of the things that make Elastic, Elastic.

They are a set of ideas rather than a statement of values. Some are accurate to who we are while others are aspirational.

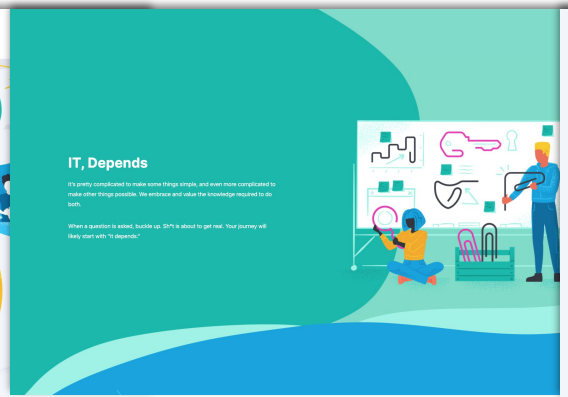
They are reminders that keep us steadfast because we're not perfect, we're human.



Home, Dinner

There is no such thing as work-life balance. We are successful if we find balance in life. Elastic empowers you with the flexibility to do so. Be home for dinner, go for a run midday, care for a sick child, or visit a parent.

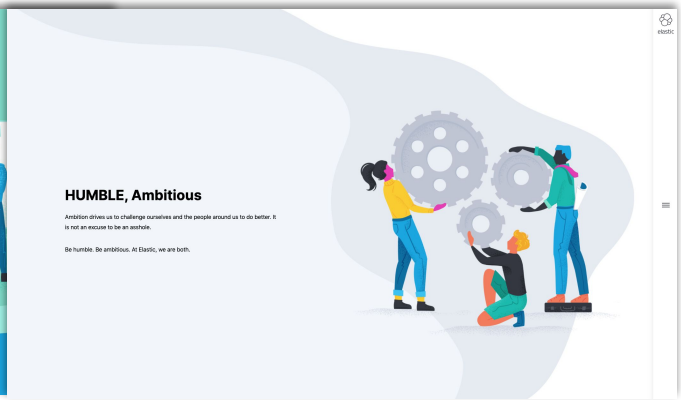
Finding balance means being more innovative and efficient at work. Which makes for a better Elastic.



IT, Depends

It's pretty complicated to make some things simple, and even more complicated to make other things possible. We embrace and value the knowledge required to do both.

When a question is asked, buckle up. Sh*t is about to get real. Your journey will likely start with "It depends."



HUMBLE, Ambitious

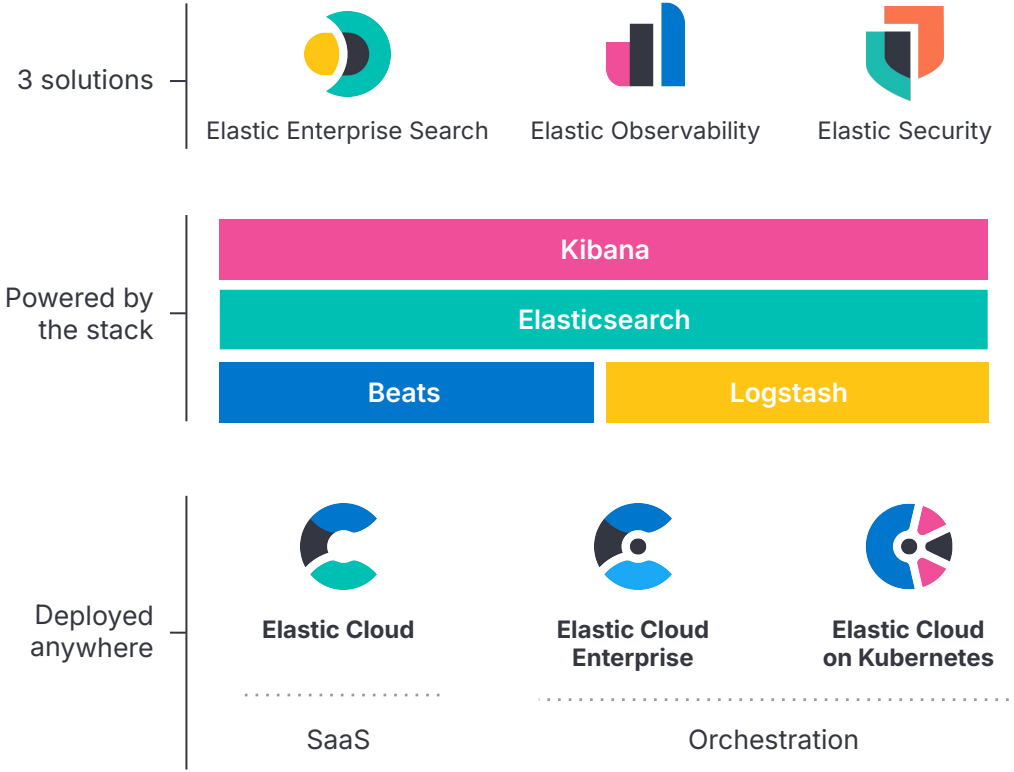
Ambition drives us to challenge ourselves and the people around us to do better. It is not an excuse to be an asshole.

Be humble. Be ambitious. At Elastic, we are both.

So Elasticsearch, Kibana? Where are the maps?

elastic

Deploy anywhere.



Please talk about maps
No, show some maps

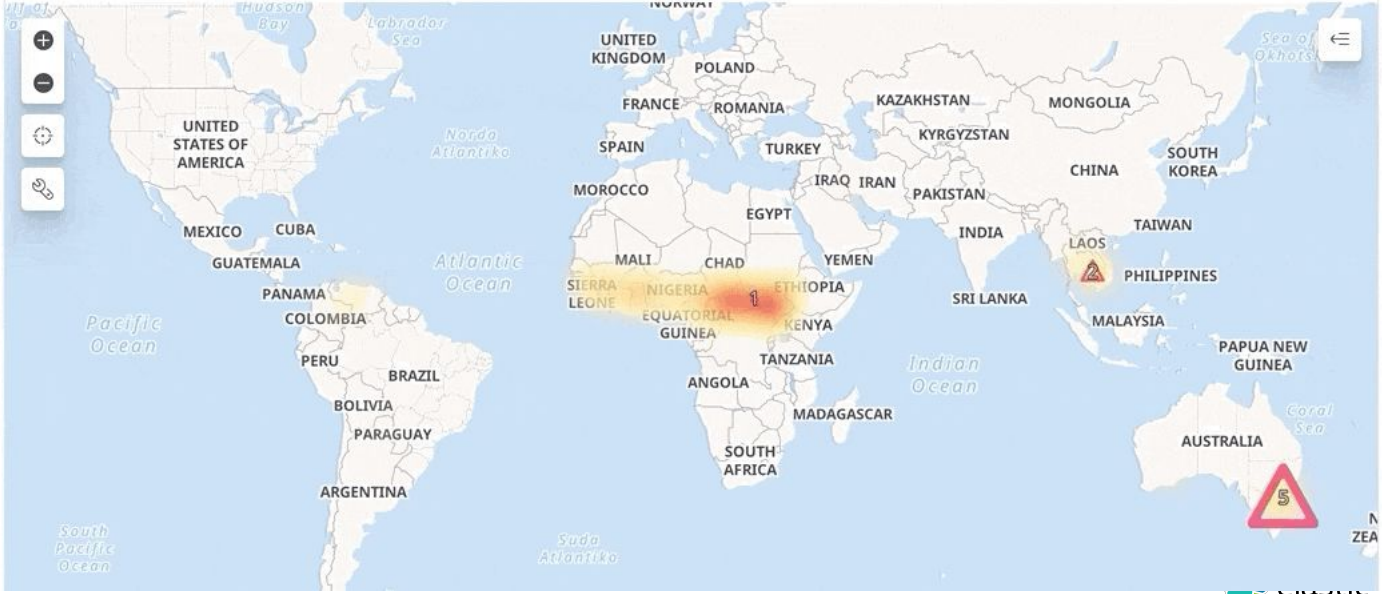
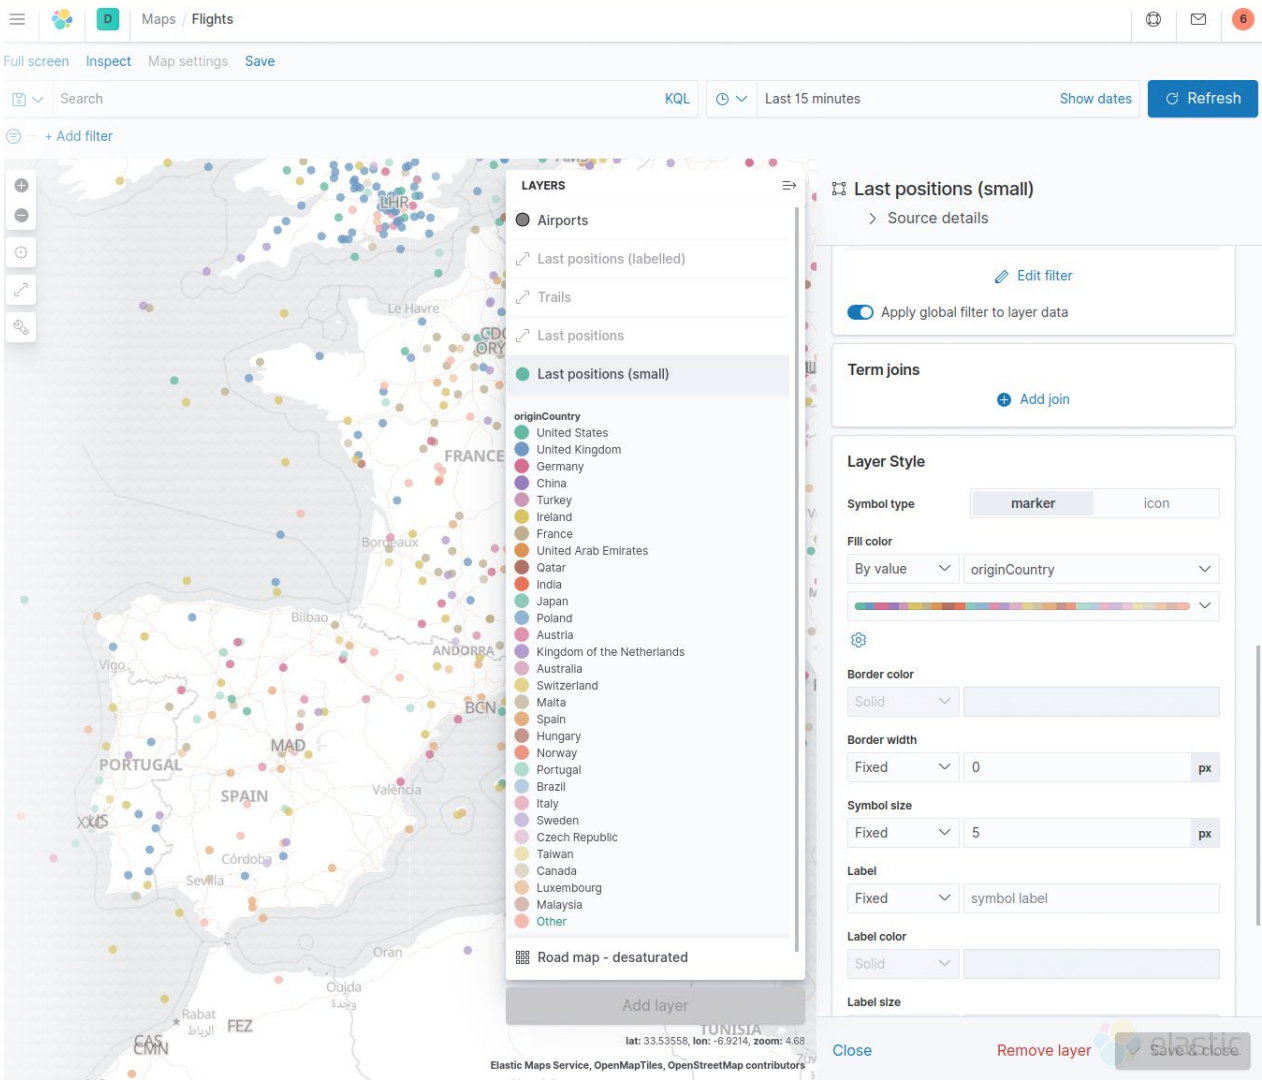
Wild Fires



Elastic Maps

- Elastic Maps provides a visualisation onto your geographic data in Elasticsearch
- There are three things to take note of:
  - Kibana
  - Maps App
  - Elastic Maps Service
- A steady progress in adding and improving features



Elastic Maps Service

maps.elastic.co/#file/world_countries

Elastic Maps Service
